Todd Gilbert

SENIOR PRODUCT DESIGNER

Portfolio LinkedIn Mail

I design systems that are transparent and trusted.
From shaping AI behavior to shipping UI control surfaces.

WORK

Senior Product Designer: AI @ Credo AI 2024 - PRESENT

Enterprise AI governance and risk

Designed AI-powered workflow that converts user intent into structured, policy-aligned data: converting a previously week-long coordination problem into a single streamlined session.

Scaled governance system from individual to shared entity model, reducing duplicate entity creation, fast-tracking low-risk use cases, and eliminating days worth of redundant review work per governance cycle.

Shifted design deliverables from static artifacts to code and markdown, enabling faster and more precise frontend implementation.

Design Engineer @ Numeric 2023 - 2024

Accounting and financial reporting software

Expanded and optimized design system and component architecture that scaled product to platform, helping users navigate technical workflows.

Senior Product Designer @ Worktango 2021 - 2023

Employee experience

Unified fragmented persona workflows into cohesive system, unlocking cross-product adoption.

Designed rewards system and gamification extensions to recognition product.

Product Designer @ Freelance 2020 - 2021

Built the initial design system and workflows that supported Numeric's Series A and 3x team expansion.

SCHOOL

B.S. Economics **Duke University '17**
